Continuation: Applicants argued that Stewart does not disclose an NTFT and PTFT transistors, wherein a wiring connects one of the impurity regions of one of the transistors with a gate electrode of the other. The Examiner concedes -- although a wiring connects one of the impurity regions of one of the transistors with gate electrode of the other -- that Stewart does not explicitly disclose an NTFT and PTFT transistors and agrees to reconsider the rejection of claims 13-25 under 35 U.S.C. 103(a).
